

School Nurse Survey (Asthma Management)

This is a brief survey that will be used to collect data about the current management of students with an Asthma diagnosis in schools. Please help me with my school project by completing this survey to the best of your knowledge. No names or school names will be used, only numerical data.

- Other:

What is your process for determining that a student with a **current** asthma diagnosis needs a health care plan? *

- Health Care provider advice
- Parent or guardian advice
- Nurse assessment with parent
- All of the Above
- Other:

Comment: What is your process for determining that a student with a historical asthma diagnosis **does not need** a health care plan?

Your answer

Are Asthma care plans developed annually for all students currently diagnosed with Asthma? *

- Yes
- NO
- Other:

A health screening survey, specifically asking about Asthma diagnosis is conducted yearly for all students including those with a current health care plan? *

- Yes
- No
- Other:

Does the school have policies and procedures in place to communicate the students care plan with parents? *

- Yes
- No
- Other:

Does the school have policies and procedures in place to communicate the students care plan with teachers and other school staff? *

- Yes
- No
- Other:

Does the school have policies and procedures in place to communicate the students care plan with health care providers? *

- Yes
- No
- Other:

Does the school have an established clear method of communication with pediatricians including a release of information process? If yes, please explain. *

Your answer

Related to Absences; Does the school keep documentation of a student's absenteeism when it is related to an Asthma? *

- Yes
- No
- Other:

What **barriers** are experienced by your school district that prevent or limit you into putting all of the previous processes into place? For example; Creating a Health Care Plan every year, assessing or screening for Asthma, maintaining communication with providers, keeping track of absences due to Asthma exacerbations. Select all that apply *

- Lack of Communication with Parents
- Unable to communicate with Health Care Providers
- Language Barrier between school nurse and parents
- Lack of transportation by parents
- Shortage of Health Room Personnel
- Time constriction
- Rural area, location
- Appointment availability
- Other:

What do you think are some facilitators that have helped you to collect Health Care Plans, and medications for students who are currently diagnosed with asthma? *

- Parent communication (phone calls)
- Direct Student communication
- Robo calls, smart phone reminders (Parent Square, Remind)
- Mail (Letters Mailed home)
- School MOU with local health clinic
- Team work with other school staff
- Other:
